

Biomimicry Walk at the Singapore Botanic Gardens

An Event brought to you by Biomimicry Singapore Network

Join us to celebrate **Earth Day** by drawing inspiration from nature!

Join **Dr. Anuj Jain** (Ecologist and Biomimic) for a guided naturewalk to discover what we can learn about nature's strategies and adaptations from our local biodiversity to help us solve human challenges and meet our goals more sustainably. This walk, the first in a series of upcoming biomimicry walks, will focus on 'water'. We will visit the tropical rainforest and the desert plants exhibit at the Botanic gardens to learn and contrast the strategies of organisms under extreme conditions - the abundance and lack of water.

Meet at the Botany Centre (in front of the gardens shop, near Tanglin Gate of Botanic Gardens) on **Saturday, 22nd April 2017 at 8 am**. The event should last for **2.5 hours**. Please come prepared for both rain and shine. Kindly register your interest at anuj@biomimicrysingapore.net.
